DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kameyama (JP60-114836). Kameyama teaches a camera having a main body portion 1 and a lens camera cone 3 comprising a positioning means 31 for positioning the cone at a predetermined reel out position (fig. 2) and a predetermined sinking position (fig. 1). An energizing means 30, in the form of a toggle spring, energizes the cone toward the reel out position at a time when the lens camera cone exists in a portion near said reel out position (see fig. 9) and energizes the lens camera cone toward a sinking position at a time when the lens camera cone exists in a portion near said sinking position (see fig. 8). The applicant is directed to additionally review figure 3.

Allowable Subject Matter

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-11 are allowed.

Art Unit: 2851

Response to Arguments

Applicant's arguments, filed March 6, 2003, with respect to the rejection(s) of the claim(s) as being anticipated by Waaske and Arita have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Kameyama as presented above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. For example, Komatsuzaki (U.S. Patent No. 4,961,084) discusses the Kameyama reference.
